

Introduce Yourself:

-Hello Everyone/XYZ, I am Tanishq Chourishi, a Senior Undergraduate majoring in Mechanical Engineering at IIT Kanpur. I did my schooling in Mumbai.

- I would describe myself as a hardworking and tenacious person who likes solving high-impact, challenging problems.

-I recently interned as a Data Scientist Intern at JK Technosoft, where I worked on the automation of Revenue Cycle management and Computer assisted coding and billing in the healthcare sector.

- On the managerial side, I was the assistant coordinator- Academics Core Team of Counseling Service IITK, where I led a team of 127 AMs and 160 Senior Academic Mentors.

-I cofounded a pro bono organization CovEd India envisioned providing academic Support to higher secondary students across the globe. Eventually catering about 1000+students with the help of 300+ mentors. CovEd India was finally acquired by a daughter organization of Khan Academy ,Schoolhouse.world.

-I love the art of photography and a few of my pieces have been published in the official calendar of IIT Kanpur 2021.

Why management/Financial consulting?

-I like to do managerial + technical work with a high level of responsibility:

I have explored a lot of technical stuff like Robotics, Data Science, Finance etc. and also seen the non technical side of things during my tenure at CovEd India and Counseling Service. There, I had ownership and responsibility, which I enjoyed and made the most out of it. I liked the interactive, open-ended and high impact nature of work. Consulting is best fit for this kind of work. / Thus Financial Consulting is the best fit for someone looking towards the financial+managerial+technical intersection type of work.

-People and Learning:

In the initial phase of my career, learning is the most important thing I am looking for. I have always believed that to grow quickly one needs to surround themselves with very smart and talented people. The profiles of the people working in management consulting are mind-blowing. It will be a great learning opportunity to understand the businesses inside out.

-Challenge & Reputation of Industry and Career prospects:

Working at FinMechanics will be challenging because of the sector-agnostic nature of the job. Every few months will present a new challenge. This excites me and I want to experience these challenges. Additionally, the industry experience will be invaluable for me in all my future endeavors.

What area / environment do you prefer?

I've worked in a variety of settings and have appreciated discovering new things in each. I would say that while I don't have a certain working atmosphere that I prefer, I do truly enjoy working with individuals who are dedicated to finishing tasks and who are enthusiastic about their jobs.

Why join FinMechanics

I shall get the opportunity to work with capital markets, commodity/energy markets, risk and technology teams of banks. I shall get the opportunity to learn about global markets and risk management, understand business problems in this space and provide creative strategic solutions and advice to solve clients' problems. I shall get the opportunity to build working relationships with business sponsors, senior managers and users to resolve issues related to prioritization, requirements definition or scope conflicts.

Finmechanics offers software solutions to clients of the finance sector and hires the best consultants. As the strength at the firm is small, one would be able to hold ownership and full responsibilities of projects early on in their career. After interacting with a few seniors working in the company their experience inspired me alot.

Why should we hire you?

"This is a wonderful opportunity for me to get interviewed at such a renowned company. Your organization will surely prove to be an excellent platform for me to establish my skills and knowledge in the corporate world. Even though I am a fresher, I assure you that I will give my best and work to my full potential so that I can contribute as much as I can towards the growth and welfare of this great brand."

Where do you see yourself after X years?

I look forward to learn new skills and improve my knowledge to advance my career. In five years from now, I see myself as a knowledgeable professional having an in-depth knowledge of the company and the industry.

What are your strengths?

- I am tenacious and hardworking.
 - Keep going once I take up a job. I have been a part of the team and clubs right from my first year till now. (More instances from resume)
- Quick learning has enabled me to explore a large number of domains and skills in a short time.
- Communication and speaking skills. Structuring, understanding and explaining large amounts of information in a precise way owing to debating.

What is your weakness?

- Poor at delegating stuff. I often do a lot of work myself instead of delegating the work to the people working for/with me.
- I tend to get so engrossed in the projects I am working on that I don't want to let them go. However, I understand this is not helpful to my employer's goals, and I am learning to finish a project and then move straight on to the next one.
- I am sometimes too sensitive, and in the past, I would take criticism personally. However, I do understand that for me to continually improve professionally I need to view other people's comments as constructive and productive. I am learning to be more mindful in situations such as these when people are simply trying to help me develop.
- My weakness is the fact that I get stressed if I think a project is running over time. This is simply because I take pride in my work and I don't want to let my employer down. I am learning to remain calm in difficult situations such as these and to focus on what I can do to help get the project finished on time.

How do you handle conflict with co-workers?

- I understand the hindrance that a conflict can create to the proper functioning of a team.
- I try to take the responsibility of mediating and talking to resolve the conflict as quickly as possible.
- Talking in person, hearing out both sides and appealing to emotions like team spirit whenever possible
- Assign separate roles, and make them work concurrently if I am leading
